📄 Files changed 15

 Ph4ntomic commented [last week](#)

Owner

Summary

- define MiniJava regex tokens for strings, chars, keywords, annotations, and comments
- implement RegexHighlighter and ScanningHighlighter
- add focused unit tests and integration checks for the provided start text
- add documentation and postmortem for Blatt 04

Verification

- .\gradlew.bat clean classes test spotlessCheck
- .\gradlew.bat test
- .\gradlew.bat spotlessCheck

Result: 23 tests, 0 failures, 0 skipped.

Review focus

- token order and regex edge cases
- overlap handling in RegexHighlighter
- longest-match and tie behavior in ScanningHighlighter
- CI jobs: build, test, format

😊

Collaborator

Moin, was mir bei der PR direkt aufgefallen ist, dass wir eigentlich drei getrennte Feature-Branches für *MiniJavaTokens*, *RegexHighlighter* und *ScanningHighlighter* machen sollten.
Ist denke ich nicht weiter wichtig, wollte es nur einmal schon geschrieben haben :)

Author

Danke fuer den Hinweis. Ich habe den Sammelstand jetzt in die geforderten getrennten Feature-Branches aufgeteilt und in Reihenfolge gemergt:

- [Blatt 04: MiniJavaTokens vervollstaendigen #2](#) feature/minijava-tokens
- [Blatt 04: RegexHighlighter implementieren #3](#) feature/regex-highlighter
- [Blatt 04: ScanningHighlighter implementieren #4](#) feature/scanning-highlighter
- [Blatt 04: Integrationstest und Dokumentation ergaenzen #5](#) Abschluss mit Integrationstest/Dokumentation

Damit ist dieser urspruengliche Sammel-PR durch die getrennten PRs ersetzt.
